

Range of Exhibitors:

National rescue and salvage authorities
Diving, salvage technology and equipment
Offshore engineering technology and equipment
Shipbuilding
Smart marine equipment
Information equipment for offshore project
Wind farm equipment
Tourism diving equipment and apparatus
Water emergency rescue equipment and equipment
Diving equipment and apparatus for fishery
Equipment and apparatus for ship pollution prevention
Scientific research and innovation
Service product for diving, salvage and offshore engineering

Stall Price:

1. Standard booth (9 m²): 2,000USD each
2. For CDSA members: 10% off for first-time participants, 15% off for second-time participants and 20% off for third-time participants
3. Discounts may apply to non-members of CDSA
4. More stall options available upon inquiry

Exhibition Activities:

1. The 8th International Forum on Diving, Salvage and Offshore Engineering
2. The 3rd China Tourism Diving Summit and Divers' Forum
3. Business recommendation and negotiation for diving, salvage and offshore engineering technology and research
4. CDSA 2023 Annual Meeting, Executive Board Meeting, Board Meeting
5. Themed salons

Organizing Parties:

Organizers:

China Diving and Salvage Association (CDSA)
Association of Diving Contractors International (ADCI)
International Marine Contractors Association (IMCA)

Guided by:

Xiamen Municipal Bureau of Ocean Development
Xiamen Municipal Bureau of Convention and Exhibition Affairs

Co-organizers:

China Rescue and Salvage
China Maritime Safety Administration
China State Shipbuilding Corporation Ltd.
China Communications Construction Company Ltd.
China National Offshore Oil Corporation
National industrial associations
Major marine universities in China
International organizations

Host:

Beijing Hongyi Maritime Consulting Services Co., Ltd.

中国潜水救捞行业协会
CHINA DIVING AND SALVAGE ASSOCIATION

The 6th International Diving Salvage and Marine Engineering Equipment Exhibition 2023

2023 第六届国际潜水救捞与海洋工程装备展览会

2023.11.10--11.12
Xiamen Fliport C&E Center
Fujian Province, China

About China Diving and Salvage Association (CDSA)

The China Diving and Salvage Association is the only state-level non-profit association constituted by enterprises and institutions involved in diving, salvage, rescue, marine and underwater engineering, equipment and facility manufacturing, diving medial support, marine research, pollution prevention, training and insurance in China.

Since its foundation in June 2008, CDSA has experienced steady growth of membership from 114 to nearly 1,000 members today. The Association has set up 5 offices, 1 liaison office, 3 divisions and 12 specialized committees, and has developed into an influential industry association at home and abroad. The CDSA is committed to playing a role of bridging and linking among the industry, government and society by serving the country, serving industry and serving members.

Overview about the exhibition:

Approved by the Ministry of Commerce of China, the 6th International Diving Salvage and Marine Engineering Equipment Exhibition will be jointly staged by China Diving and Salvage Association (CDSA), Association of Diving Contractors International (ADCI) and International Marine Contractors Association (IMCA) in Xiamen, China from November 10 to 12, 2023.

The exhibition is the only event of its kind in China that focuses on showcasing diving, salvage and offshore engineering equipment as well as technological exchange, ranking as a worldwide leading exhibition in terms of scale and influence. It has been successfully held for five times since 2015 when the exhibition was relocated to Xiamen as its host premise, gaining wide recognition in the diving, salvage and offshore engineering sectors at home and abroad thanks to its large scale, high-calibre level, active attendance, cutting-edge technology and extensive coverage of subjects in the industry.

Covering an exhibition space of 11,000 sqm, the 5th exhibition held last year from November 18 to 20 in Xiamen attracted 153 exhibitors, among which there were units of China Rescue and Salvage of the Ministry of Transport and large Fortune-500 companies such as China State Shipbuilding Corporation Ltd., China Communications Construction Company Ltd. and China National Offshore Oil Corporation. An international forum was held along with the exhibition where six Chinese academicians made their keynote presentations. Over 4,200 visitors from across the country took part in the exhibition.

Theme:

The theme of this year's exhibition is Safe, Smart and Green Development. It is expected to promote the economic and cultural exchange within the sector by offering various stakeholders a platform to discuss the overall resource planning of international salvage and offshore engineering, as well as the construction of modern marine industrial system, which serves the country's vision for the sustainable development of marine economy and ecosystem.

Highlight:

1. The most authoritative international exhibition on diving, salvage and offshore engineering equipment in China
2. The top-calibre international exhibition with the highest level of attendance, scale, influence and sci-tech content in China
3. An ideal international platform for sci-tech exchange and business negotiation as it combines the showcase of latest products and technology of diving, salvage and offshore engineering, the cooperation of technology and trade, technical seminar and presentation of equipment and products
4. Strongly endorsed by the transport, marine, emergency management, tourism, fishery and municipal administration authorities, closely-observed by procuring agencies such as China Rescue and Salvage, China Maritime Safety Administration and ocean hydrographic survey agencies, and actively-participated by international salvage organizations, marine-related universities, research institutions, manufacturers and users of relevant equipment
5. Nurtured sound and friendly relation with relevant companies and organizations from home and abroad
